P8131 HW2

Shihui Zhu, sz3029

Problem 1

Fit the model with logit, probit, and complementary log-log links

```
## # A tibble: 5 x 2
##   dose_x num_of_dying
##    <int>        <dbl>
## 1      0            2
## 2      1            8
## 3      2           15
## 4      3           23
## 5      4           27
```

```
data1$dose_x <- as.factor(data1$dose_x)
```
